

Speaking about your future profession.

I am a student of the "High-Precision Airborne Devices" department of the BMSTU. I chose it because

Some of the subjects we study are: design features of munitions and explosive devices, applied continuum mechanics, theory of explosive materials, etc.

Next year, we are supposed to choose our major. I plan to study (munition design, industrial application of explosives, computer-aided research, guided munitions etc) because

My term project this year is devoted to I am doing research/design work in the field of

The most interesting/difficult/boring/etc aspect(s) of my research/design work is (are)

In the future, I would like to (continue working on this topic/try something else (what?)/apply for a scholarship in Europe/etc)
